Based on scientific research on how to reduce consumption of a toxic product (raising the cost) and how to mitigate the impact on community health of sugary drinks (by directing fee revenue to pay for improved food, water and physical activity access), this fee on sugary drinks has the potential to improve health in SF's low-income communities and be a model for other governments looking to reduce rates of diabetes and other chronic disease.

Additionally, the student must enter his or her freshman year at an accredited two- or four-year university, college, or vocational/technical institute during the fall of 2014. GreenPal will publish all applications essays on the GreenPal blog. Social media shares will serve as a method of voting and will be used as a component for picking the annual scholarship recipient.
